Internal Memorandum

Document ID: SIHD/CSAIT-18-C

Classification: Internal – Acknowledgment of Clarification

Date: 31 March 2026

To: Budget Committee (BC), Desk B/03

From: SIHD – CSAIT/18

Re: BC-07-C Designation – Intention Host Device (IHD)

1. Receipt

SIHD acknowledges receipt of BC-07-C and the reclassification of the Intention Host Device (IHD) submission as pre-demand exploratory under C designation.

The designation is accepted without contest.

2. Assignment

CSAIT/18 has been assigned responsibility for demand observation as outlined in Section 3 of BC-07-C.

Observation protocols are being established within existing MPSoL / MPSoWaL channels.

No additional infrastructure is requested at this time.

3. Internal Note (Unrequested)

It was not anticipated that the submission would progress to formal classification.

Historically, proposals of this type have remained internal to SIHD or been informally disregarded at earlier stages.

The present outcome is noted.

4. On Intent

The originating submission should not be interpreted as a fully stabilized technical proposal.

Elements of the design were introduced under conditions of exploratory framing, including:

- compression of multiple existing concepts into a single object
- deliberate ambiguity in mechanism description
- and tolerance for interpretive overreach

These characteristics are consistent with prior SIHD internal constructions.

5. On Current Status

Despite the above, the assignment of demand observation produces a condition in which:

- descriptive materials are now being circulated
- interest may be measured where previously it was not
- and the object, regardless of origin, enters external consideration

This represents a change in state.

6. On Demand

At present, no formal demand has been established.

However, preliminary indicators—if observed—will be recorded without interpretation.

CSAIT/18 will not attempt to distinguish between:

- interest in the device as described
- interest in the device as imagined
- or interest in the device as an artifact of the system itself

All are considered valid inputs at this stage.

7. Clarification

SIHD confirms that no production activity is underway.

No prototype units exist.

No claims are being advanced.

All outward-facing materials will reflect this status.

8. Informal Addendum

It is noted that the Budget Committee has, in effect, converted a non-instrumental submission into an observable process.

No objection is raised.

9. Disposition

CSAIT/18 will proceed with passive demand observation.

Findings, if any, will be reported upon threshold emergence.

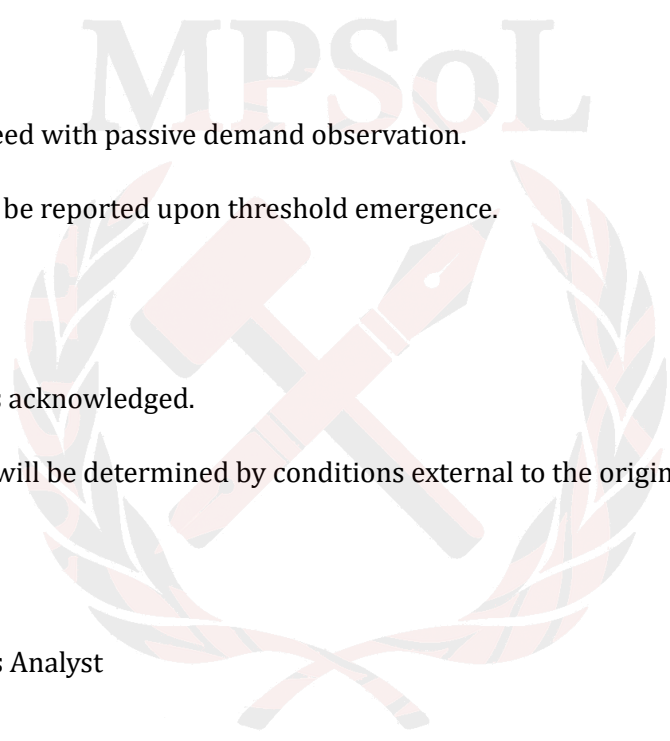

10. Closing

The C designation is acknowledged.

Further movement will be determined by conditions external to the originating submission.
